Guidance Note – Sharing your Health Record

The Three Chequers Medical Practice takes its responsibility under the Data Protection Act 2018 (incorporating GDPR) very seriously.

Please read this information very carefully to understand why, how and when the Practice might wish to share your information with selected other organisations and why we ask for your consent to other organisations sharing your health record with us.

What is your health record?

Your health record contains all of the information about the care you receive. When you need medical assistance, it is essential to that the Clinician(s) involved in your care can securely access your health record, in order to provide treatment that is tailored to you, based on your medical background. This may include your medical history, medication and allergies.

Why is sharing important?

By sharing your health record, you receive the best possible care and treatment – wherever and whenever you need it. Choosing not to share your health record could have implications on the quality of care and treatment you receive in the future.

Some examples of how you can benefit from the sharing of your record are:

- **Sharing your contact details** ensures you received medical appointments without delay
- **Sharing your medical history** ensures emergency services accurately assess you if needed
- **Sharing your medication** list will ensure that you receive the most appropriate medication
- **Sharing your allergies** prevents you from being given something to which you are allergic
- **Sharing your test results** will prevent you from having to repeat tests more than required

Furthermore, it is important that we can see information that other organisations have added to your health record to ensure that you are receiving the best treatment possible.

Is my health record secure?

Yes. There are numerous safeguards in place to make sure that only organisation authorised to view your record can do so. You can request information regarding who has accessed your information at any time.

Can I decide who I share my health record with?

Yes, we will always ask for consent to share your health record unless it is an emergency – if you are unconscious for example.

Can I change my mind?

Yes – at any time, just let us know.

Can someone consent on my behalf?

If you do not have capacity to consent, then a Lasting Power of Attorney (LPA) may be able to consent on your behalf. If you do not have an LPA, then a “best interest” decision can be made on your behalf by those caring for you.

What about Parental Responsibility?

If you have parental responsibility and your child is not able to make an informed decision, then you can make a decision about information sharing on behalf of your child. If your child is deemed “competent” (to make an informed decision) then the decision is theirs.

What is a Summary Care Record?

A Summary Care Record (SCR) contains basic information about you (contact details, NHS number, medications and allergies etc). GP Practices, Hospitals and emergency services can view this. If you do not want an SCR, then ask the Practice for an “opt-out” form. You can provide consent for an “enhanced” SCR which will include information such as care plans, which will help ensure that you receive the care you require in the future.
