

Welcome to our Practice

Thank you for registering with us. Our aim is to provide services and facilities that will contribute towards a healthy future for you. As part of the registration process we ask you complete the enclosed pack – this will give us all of the information we need to ensure we have everything we need to provide you with the care you want and need.

Once you have completed all of the enclosed documents, please return this to the Practice along with two forms of identification (at least one of which must have a photo **and** current address – like a driving license – and the other must be either Photo ID or Address verification – a passport or recent utility bill).

Please complete all sections in **BLOCK CAPITALS**.

Guidance Note – SMS / Email Consent

The Three Chequers Medical Practice offers the complimentary service of providing SMS and email messages to all of our patients.

These messages might be relating to test results, appointment reminders or information about upcoming health campaigns and other information relating to your health or our services.

Although all text messages and emails are generated using a secure facility, they are transferred over a public network onto a personal telephone and, as a result of this, may not be secure. Messages sent via SMS or email will not contain “identifiable” information to ensure the preservation of your identity under the Data Protection Act 2018 (incorporating GDPR). As such, patients are encouraged **not to provide** consent for their number to be used for more than one record as this may lead to confusion regarding the identity of the intended recipient.

The Three Chequers Medical Practice **will never** share your personal information, including contact details, with a third party that is not involved with providing care to you.

It is important to note that patients who consent for SMS / email messaging can withdraw this consent at any time by informing a member of staff of their wish to do so.

Contact information given by a patient for their own records will **only** be used for information regarding them. The practice will never use these details to provide information about another family member.

These services are provided as a courtesy to our patients and as such, **no guarantee can be made that reminders and messages about test results will be sent on all occasions**; it remains the **responsibility of the patient** to attend, cancel or amend any appointment they have and to obtain the results of their tests.

Guidance Note – Dispensing Medicines

We are a Dispensing Practice – this means we can dispense medication to some of our patients, depending on the reason or where they live.

Our main dispensary is in Porton, with a secondary dispensary located in Winterslow to serve the communities of these villages. We also have a small dispensary in our Endless Street branch for urgent prescription fulfilment.

Our dispensers receive excellent training and work exceptionally hard, ensuring that repeat-prescriptions and urgent prescriptions are dealt with in a timely manner.

If you normally pay for your prescriptions, you will still have to do so, prior to collecting your prescription. We take card and cash at all of our dispensaries.

As a general rule of thumb, if you live in one of the following villages, we are able to dispense medicine to you:

Pitton	Whaddon	Odstock
The Winterbournes	Alderbury	Nunton
Gomeldon	West Grimstead	Winterslow
Porton	East Grimstead	Coombe Bissett

For patients living in these areas there are a few options on how you collect your medication; you can pop into your chosen Dispensary to collect your medicine; collect from one of our nominated “Collection Points” (Pitton Post Office / Alderbury Shop / Whaddon Post Office / Coombe Bissett Stores); or, if you’re housebound, we can deliver the medicine to your door.

We aim to have all repeat prescriptions dispensed within **4 working days** of receipt during peak times.

Our Dispensary relies on the support of the village communities in order to survive, please use our service if you are eligible. Eligible prescriptions sent to a Pharmacy or online service threatens the long-term viability of our Dispensaries and your support is greatly appreciated.

If you are not eligible, or if you wish to, you can opt to have your prescriptions sent to another Pharmacy. Please give details of this in Section 9 of the Application Pack.

All patients of the Practice suffering from a Long-Term Medical Condition or receiving a repeat prescription must undertake an annual review of the Medical Condition(s) and medication with the Practice. This is to ensure that you are receiving the appropriate care.

Guidance Note – Sharing your Health Record

The Three Chequers Medical Practice takes its responsibility under the Data Protection Act 2018 (incorporating GDPR) very seriously.

Please read this information very carefully to understand why, how and when the Practice might wish to share your information with selected other organisations and why we ask for your consent to other organisations sharing your health record with us.

What is your health record?

Your health record contains all of the information about the care you receive. When you need medical assistance, it is essential to that the Clinician(s) involved in your care can securely access your health record, in order to provide treatment that is tailored to you, based on your medical background. This may include your medical history, medication and allergies.

Why is sharing important?

By sharing your health record, you receive the best possible care and treatment – wherever and whenever you need it. Choosing not to share your health record could have implications on the quality of care and treatment you receive in the future.

Some examples of how you can benefit from the sharing of your record are:

- **Sharing your contact details** ensures you received medical appointments without delay
- **Sharing your medical history** ensures emergency services accurately assess you if needed
- **Sharing your medication** list will ensure that you receive the most appropriate medication
- **Sharing your allergies** prevents you from being given something to which you are allergic
- **Sharing your test results** will prevent you from having to repeat tests more than required

Furthermore, it is important that we can see information that other organisations have added to your health record to ensure that you are receiving the best treatment possible.

Is my health record secure?

Yes. There are numerous safeguards in place to make sure that only organisation authorised to view your record can do so. You can request information regarding who has accessed your information at any time.

Can I decide who I share my health record with?

Yes, we will always ask for consent to share your health record unless it is an emergency – if you are unconscious for example.

Can I change my mind?

Yes – at any time, just let us know.

Can someone consent on my behalf?

If you do not have capacity to consent, then a Lasting Power of Attorney (LPA) may be able to consent on your behalf. If you do not have an LPA, then a “best interest” decision can be made on your behalf by those caring for you.

What about Parental Responsibility?

If you have parental responsibility and your child is not able to make an informed decision, then you can make a decision about information sharing on behalf of your child. If your child is deemed “competent” (to make an informed decision) then the decision is theirs.

What is a Summary Care Record?

A Summary Care Record (SCR) contains basic information about you (contact details, NHS number, medications and allergies etc). GP Practices, Hospitals and emergency services can view this. If you do not want an SCR, then ask the Practice for an “opt-out” form. You can provide consent for an “enhanced” SCR which will include information such as care plans, which will help ensure that you receive the care you require in the future.

Further information can be found at www.nhs.uk/nhsengland/thenhs/records

11. Accessing Online Services

Important Information Please read before completing the form

Patients who wish to, can use the internet to book appointments with a GP, request repeat prescriptions for any medications taken regularly and look at their medical record online. This is in addition to contact through traditional means for all of these services.

It is a patient's responsibility to keep their login details secure. If you suspect that your record has been accessed by someone who does not have permission to do so, then you should change your password immediately. If you are unable to do this, we recommend that you contact the practice so that online access can be revoked until the issue is resolved.

Any information printed from a patient's record, by a patient or their representative, is the responsibility of the patient (or representative) to keep secure. If you are worried about securely storing copies, we recommend that you do not make copies.

In the process of carrying out their normal duties, Practice staff have to input data to your record; this could be attaching a document received or something similar – you may notice administrator or reception staff names alongside some medical information – this is normal and not a cause for concern.

The definition of "Full Medical Record" is all of the information that is held in a patient's record, including; letters documents and free text added by staff, usually the GP. The coded record is all the information that is in coded form, like diagnosis, signs and symptoms – but excludes letters, documents and text.

Before applying for online access to your record, there are some things to consider. Although the chances of these circumstances are low, you will be asked to confirm that you have understood the following:

Forgotten History

There may be something that you have forgotten about in your record that you might find upsetting

Abnormal results or bad news

If you have access to test results or letters, you may see something that you find upsetting to you. This may occur before you have had a chance to speak to a Doctor or while the surgery is closed and unavailable for contacting

Choosing to share your information with someone

This is your choice to make, and may be very helpful for you – however, it is your responsibility to ensure that your information remains secure.

Coercion

If you think that you may be pressured into revealing details of your record to someone against your will, it is best that you do not register for online access.

Misunderstood Information

Your medical record is designed to be interpreted by clinical professionals to ensure you receive the best possible care; therefore some of the information within your medical record may be highly technical, written by specialists and not easily understood. Please contact the Surgery for clarification and explanation of your records.

Information about someone else

If you spot something in the record that is not about your, or there are other errors, please log out of the system immediately and contact the practice as soon as possible.

More information can be found at: www.nhs.uk/nhsengland/aboutnhservices/doctors/pages/gp-online-services.aspx

Before your request for online access can be processed, we will need to see photographic proof of your identity. In order to ensure that we can complete this request in a timely manner, please ensure that you have brought two forms of Identification (Photo & Address)
